

Special Programs Snoezelen – Multi Sensory Environment Centre De Hartenberg, Ede, The Netherlands

These special programs are organised at the Centre De Hartenberg, the cradle of Snoezelen.

Since the mid seventies Snoezelen is developed at the Centre De Hartenberg and spread worldwide in more than 45 years.

Your referent is Ad Verheul, co-founder and developer of Snoezelen.

The practice time during the special program take place in the 400 m² Snoezelen Complex of the Centre De Hartenberg.

The new Snoezelen room (2017)

The centre De Hartenberg is part of the organisation 's Heeren Loo Zorggroep, a leading Dutch organisation for the mentally healthcare. With the help of approximately 1500 members of staff it cares at the moment for 1050 mentally disabled in an area of about 50 kilometres. The centre is situated in vast pinewoods covering 85 hectare. In a nearby village are integrated living quarters with day care centres. In other surrounding villages are more integrated living quarters, which are partially linked to day care centres. Each of the apartments is a self-sufficient unit, doing their own cooking and shopping. All apartments have a certain budget available. Each residential group has a very big direct influence on the entire management. Starting point for that philosophy is:

-“As normal as possible, specific only if needed”-

Living surface, an interactive floor

The participant fees include a DVD box with 2 DVD and CD-ROM. On this CD-ROM is a digital version of the book available

*** The participant fees include a CD-ROM Box. On this CD-ROM is a digital version of the book: "Snoezelen materials homemade" and many PowerPoints presentations available**

The participants' fees have to be paid in cash at the visit to the Centre De Hartenberg.

Also 2 or 3 days programs at the Centre De Hartenberg and presentations at location at your school or institute are possible. Prices and costs calculation on request.

Snoezelen materials homemade

Abstract the book: "The new edition of the book "Snoezelen materials homemade" displays every example of how to make your own Snoezelen materials. The book is not here of theory and practice of the possible (created in previous language) "Snoezelen materials - A4 Verbond" (Ege) but the practical edition of "Snoezelen materials homemade" (Ege) (Snoezelen in practice) in general. The new edition of "Snoezelen materials homemade" is in special edition in the English language, to which content and presentation are clear. Although there have been added to the book many new and updated examples, it is not only a book on making Snoezelen materials but also a book on how to use them in a park.

Using the "Snoezelen materials homemade" is very well possible in all countries, under the same conditions, as long as you have the necessary equipment. The equipment can also be completely adapted to your needs. There are probably still a lot of you who are using the old, and which can also be of great help.

When making the equipment yourself, you should keep a few things in mind. Firstly, the equipment should be made of sturdy materials and be safe. Secondly, the equipment should be made of materials that are easy to use and maintain. Thirdly, the equipment should be made of materials that are safe and sound. It would be best to use equipment that is not made of a few things.

When making the equipment yourself, you should keep a few things in mind. Firstly, the equipment should be made of sturdy materials and be safe. Secondly, the equipment should be made of materials that are easy to use and maintain. Thirdly, the equipment should be made of materials that are safe and sound. It would be best to use equipment that is not made of a few things.

Although the book is a good starting point, it is not enough to read the book and make the equipment. You also need to have a lot of things that you can use in your own way. It is important to have a lot of things that you can use in your own way. It is important to have a lot of things that you can use in your own way.

A new idea of the author: Snoezelen materials homemade is a book on making Snoezelen materials, in which you can find a lot of things that you can use in your own way. The book is not only a book on making Snoezelen materials but also a book on how to use them in a park.
